8 Speed ATM Oil Pump

SNT Motiv is carrying on its reputation of a global Tier-1 company with its auto parts technology that creates the best ride quality, safety, fuel efficiency and overall quality. We are trying our best to expand the production of eco-friendly, futuristic vehicles with the best technology. SNT Motiv's auto parts business is divided into powertrain, chassis, and airbag.

- Powertrain

- Chassis

- Airbag

CVT Oil Pump

Auto Parts Business

Powertrain

Drive Unit

Drive Unit

Drive Unit is a key part of an electric vehicle ; the part is composed of a motor that creates drive torque and a reducer. The battery power supply generates torque and transports it via the reducer to fit the vehicle's driving needs.

Gen3 Front Cover Module

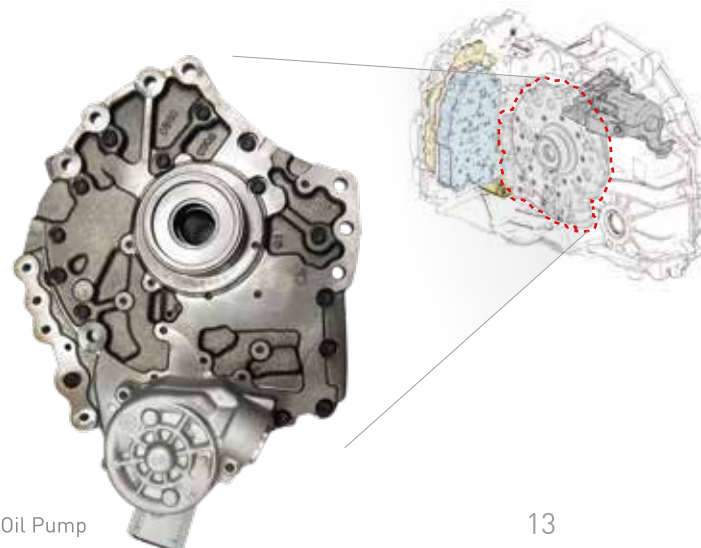

Oil Pump

SNT Motiv produces high quality oil pumps used for the drive motor of an electric car, such as the engine, automatic transmission, and Continuously Variable Transmission (CVT).

The high efficiency, quiet and compact oil pump maximizes the drive motor system's fuel efficiency and durability. It supplies oil pressure for a granular control of the valve body, torque converter as well as the cooling and lubrication of the high-speed actuator.
